

1. Required frameworks:

- .NET 4.5+

2. Add dll as reference to Visual Studio project.

3. To include namespace write:

```
using AppAnalytics;
```

4. In main page constructor add string:

```
AppAnalytics.Detector.init(" YOUR_APP_KEY"); // where YOUR_APP_KEY  
// is string (Length == 32)
```

Compatible with both WP8.0 and WP8.1
